✂ Participation & Staking Access Statement

Issued by: Tarbix Trust System – legal@tarbix.com

■ Why This Isn't a "Terms of Service"

Most companies write long, confusing contracts full of clauses you'll never read — and then hide behind them.

We don't work like that.

Tarbix is powered by trust. Real trust — as in legally-declared, public, and trackable. This is **your access guide**, not a trapdoor.

We call it a **Participation & Staking Access Statement** because that's exactly what it is:

A clear explanation of how you join, stake, earn, and engage in this system — and what that means.

👉 What Participation Means

When you join Tarbix — by staking coins, enrolling in a course, claiming an NFT, or voting — you're stepping into a system that is **decentralized, transparent, and eventually governed by the people using it**.

We don't own your time.

We don't own your data.

We're not here to sell you anything.

This ecosystem is powered by *you* — and that's exactly how it was designed.

👉 What Staking Access Means

Staking \$TARB gives you:

- Access to deeper learning and course discounts
- Eligibility for refund rewards on graduation
- Governance rights on platform decisions
- NFT triggers and surprise unlocks
- Access to certain marketplaces or tools

Staking isn't mandatory, and you can participate without it.

But if you choose to stake, you unlock additional rights and benefits.

Your staking data is *yours*. It is held securely and only used to calculate access and rewards.

You may remove your stake or request data visibility at any time.

✂ Participation & Staking Access Statement

🚫 What This System *Doesn't* Do

- We don't force you into contracts you didn't read.
- We don't lock your data behind fine print.
- We don't ask for unnecessary permissions.
- We don't change the rules after the fact.
- We don't “own” your participation — you do.

This system is open by design. If something changes, it will happen through open discussion and visible revision logs — not backdoor updates.

📄 Legal Foundations

- Participation here is protected under the **MarketPulse AI Corporate Trust**.
- That trust controls the system logic, token rights, refund schedules, and future governance.
- Our structure is legally filed, enforceable, and immune from arbitrary interference.
- All rights and responsibilities are bound to **what the trust allows**, not what some admin decides.

⚖ By Participating, You Agree That:

- You understand this is a **trust-operated platform**, not a traditional corporation.
- You are not buying stock or equity. You're unlocking tools and access points.
- You're responsible for any blockchain transactions you initiate.
- You can withdraw or revoke access at any time — but that may affect your benefits.

This system is **built for your sovereignty**, not your compliance.

🌱 Final Note

We're not here to wrap you in red tape.

We're here to build something with you.

You're not signing away your rights.

You're stepping into a framework where your actions help shape the future.

*This system is not governed by corporate policy, but by declared public trust. All interactions are symbolic, transparent, and legally scaffolded via sovereign trust architecture. Participation is voluntary, and governed by the symbolic and legal terms embedded within the Tarbix Whitepaper and its governing trust.
