# Tarbix Coin(\$STAR) White Paper

## 1. Executive Summary

Tarbix is a groundbreaking, trust-backed crypto project designed to redefine how communities participate in funding, education, and governance through decentralized symbolic architecture. It introduces a utility/meme coin (\$STAR) that interacts with an educational platform (Tarbix Academy), an NFT-based symbolic trigger system (The Veil), and a multilayered legal infrastructure owned by a private non-statutory trust (MarketPulse AI Corporate Trust).

### Key Highlights

- Total Supply: 1.5 Billion \$STAR Tokens
- 8-phase pre-sale strategy to raise up to \$22.7 million
- Legal trust structure backing every coin issued
- Staking tiers offer governance and symbolic unlocks
- NFTs trigger backend logic for rewards, governance, and automation
- Cross-brand integration: MarketPulse AI, Tarbix Academy, The Veil, and Unshyft
- Transparent dashboards and symbolic card game logic enforce smart actions

## 2. Vision and Mission

### Vision:

To establish a decentralized and symbolic learning economy that gives communities the tools to govern, grow, and fund the future they want to see.

### Mission:

To deliver a legally sound, gamified education and funding infrastructure that uses \$STAR to power access to knowledge, decision-making, and reflective governance.

## 3. Problems and Solutions

### Problems:

1. Lack of transparency in crypto fundraising models
2. Unstable token liquidity post-launch
3. Fragmented educational and crypto ecosystems
4. Limited utility in meme coins
5. Poor protection of IP and long-term infrastructure

### Tarbix Solutions:

1. **Trust-backed Coin:** Every \$STAR token is governed by legal trusts.
2. **Symbolic Integration:** NFTs and courses trigger backend logic.
3. **Transparent Dashboards:** Live staking and milestone progress.
4. **Cross-chain Design:** XRPL now, DEX, expansion, self-host planned.
5. **Governed Staking:** Vault staking, with token-based governance, The Veil card engine, and educational rights.

## Tarbix Coin(\$STAR) White Paper

### 12 Pre-Sale Phases with Milestones

| Phase   | Tokens Sold | Price / Token | Funds Raised | Milestone Unlocked                                                                                                                               |
|---------|-------------|---------------|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Phase 1 | 60,000,000  | \$0.00963     | \$577,800    | Legal formation of trust backing public governance + deployment of XRPL token + launch of multiple systems                                       |
| Phase 2 | 80,000,000  | \$0.01563     | \$1,250,400  | expand to other blockchains + Hosting whitepaper + dashboard + PDF disclosures + symbolic NFT_TCG© card prototypes + physical prints + marketing |
| Phase 3 | 90,000,000  | \$0.025       | \$2,250,000  | Tarbix Academy framework launch + first staking contract + open-source repo setup + A Surprise                                                   |
| Phase 4 | 100,000,000 | \$0.035       | \$3,500,000  | Community onboarding portal + first AI modules linked to The Veil                                                                                |
| Phase 5 | 90,000,000  | \$0.045       | \$4,050,000  | NFT_TCG© online + upgraded wallet logic + initial payroll onboarding                                                                             |
| Phase 6 | 80,000,000  | \$0.055       | \$4,400,000  | Expanded governance system + degree framework launch (earnable NFTs)                                                                             |
| Phase 7 | 50,000,000  | \$0.07        | \$3,500,000  | Cross-brand integration (MarketPulse, Unshyft, etc.) + Trust-trigger engine testing + A very big surprise                                        |
| Phase 8 | 50,000,000  | \$0.085       | \$4,250,000  | Final DEX liquidity pool fund + mobile platform optimization + bonus layer deployments + so much more! + launch of another Surprise              |

**Total Funds Raised: \$22,778,200**

### 🔑 Why This Matters:

- ✓ **Regulatory trust:** Breaks the mold of “just sell tokens and hope.”
- ✓ **Symbolic structure:** Each step mirrors real growth.
- ✓ **Transparency:** Funders see progress and know what their money builds.
- ✓ **Narrative reinforcement:** Each phase literally funds a part of the symbolic engine.

## Tarbix Coin(\$STAR) White Paper

### 5. Use of Funds (Presale Allocation)

Funds raised through the pre-sale (target: \$22.7M) will be deployed across four key operational categories:

| Category                         | % of Funds | Detailed Breakdown                                                                                                                                                                                                                                                         |
|----------------------------------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Platform Development</b>      | 37.5%      | <ul style="list-style-type: none"> <li>- Core infrastructure (wallets, staking engine, governance logic)</li> <li>- Tarbix Academy &amp; The Veil systems</li> <li>- Backend smart routing &amp; token triggers</li> </ul>                                                 |
| <b>Legal + Trust Maintenance</b> | 22.5%      | <ul style="list-style-type: none"> <li>- Non-statutory trust upkeep and filings</li> <li>- Legal counsel, compliance reviews, trademark/IP defense</li> <li>- Structuring multi-entity governance (e.g., Unshyft, MarketPulse AI, Tarbix Academy)</li> </ul>               |
| <b>Marketing + Awareness</b>     | 20%        | <ul style="list-style-type: none"> <li>- Onboarding campaigns, referral incentives, paid media</li> <li>- Influencer partnerships &amp; educational webinars</li> <li>- Airdrop execution and early NFT promo releases</li> </ul>                                          |
| <b>Liquidity Reserve</b>         | 20%        | <ul style="list-style-type: none"> <li>- Funds dedicated to supporting the \$STAR market on XRPL DEX</li> <li>- Liquidity bootstrapping for early decentralized exchange integration</li> <li>- Held in a transparent cold wallet with multiset trust oversight</li> </ul> |

#### Narrative Value of Fund Allocation:

Every dollar raised serves a transparent, measurable purpose tied to the growth, trust, and governance of the system. There are no black boxes. Only symbolic mirrors.

### 6. Staking and Symbolic Governance

\$STAR is not just a token. It is **your key to governance, education, and self-powered evolution.**

#### Staking Reward Tiers (Annual % Yield)

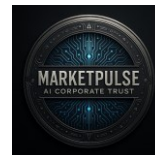

| Tier     | Minimum Stake    | Annual Reward   | Symbolic Meaning                                |
|----------|------------------|-----------------|-------------------------------------------------|
| Entry    | 250,000 \$STAR   | 0.5%            | Opens up core ecosystem access                  |
| Mid      | 500,000 \$STAR   | 1.5%            | Eligible to vote on education and platform      |
| Advanced | 1,500,000 \$STAR | 2.5%            | Grants governance influence and NFT unlocks     |
| Legacy   | 3,500,000 \$STAR | 4.0%            | Council-level symbolic status + reward boosts   |
| Cap      | —                | <b>5.0% Max</b> | To ensure sustainability + prevent exploitation |

Rewards are paid directly to the user wallet quarterly. All funds are transparently sourced and distributed through The Veil Card Engine and trust-controlled vaults.

## tarbox Coin(\$TAR) White Paper

### ■ Educational Power: Staking for Tuition©

Accredited courses on Tarbox Academy will allow learners to **stake \$TAR instead of paying cash upfront**. Upon graduation, the **full stake is returned**, giving students a **zero-cost pathway to education** while:

- Learning critical skills
- Earning bonus tokens for top performance
- Unlocking NFTs that offer ongoing benefits

These staked tokens are **held in trust**, mimicking how Traditional colleges hold financial aid — except here, **you control the terms**.

### 🧠 Symbolic Governance: The Veil of transparency©

Governance isn't just technical — it's your voice. Each staking earns more than votes; they earn choice.

#### Governance Rights Include:

- ✓ Voting on new courses, degrees, and instructors
- ✓ Proposals for new token utilities or system upgrades
- ✓ NFT utility design and symbolic trigger logic
- ✓ Budget allocations for grants, projects, and partner onboarding
- ✓ Release of Growth Vault tokens (5%) only through multi-signature, video-backed votes

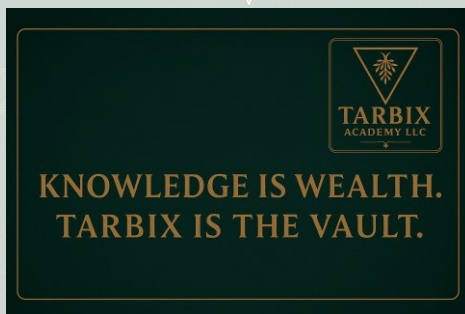

#### Every major vote includes:

- A short, symbolic **video explanation**
- A **timeline for execution**
- **Transparency logs** with community and trustee input
- Optional **Veil card** that symbolizes the outcome or trigger

### 🎁 Hidden Layers & Surprise Triggers

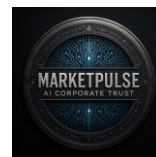

Some staking tiers or symbolic events unlock **surprise drops, bonus NFTs, or platform expansions** — but only when key phases are complete.

These are embedded in the game, not advertised like typical promotions. The deeper you go, the more the system reflects you back

## Tarbix Coin(\$STAR) White Paper

### 7. Roadmap and Milestones (Symbolic System Unfolding)

Each phase of Tarbix's evolution aligns with real funding thresholds and symbolic ecosystem growth:

| Phase   | Milestone                                                                           |
|---------|-------------------------------------------------------------------------------------|
| Phase 1 | Finalize legal trust, register Tarbix Academy LLC, deploy initial landing page      |
| Phase 2 | Deploy \$STAR token on XRPL, launch staking vault logic                             |
| Phase 3 | Activate PayPal and XRP payment rails + publish whitepaper + launch GitHub page     |
| Phase 4 | Open symbolic card framework (The Veil) + educational teaser modules                |
| Phase 5 | Launch Tarbix Academy (Learn2Earn) + NFT staking integration                        |
| Phase 6 | Begin community voting system + enable trust-backed curriculum vaults               |
| Phase 7 | Add liquidity to XRPL + initiate early listings + deploy card-NFT economic triggers |
| Phase 8 | Expansion phase: AI logic overlays, public API release, and mobile platform fork    |

🌀 Each phase unlocks a deeper symbolic and technical function, blending transparency, community control, and legal harmony.

### 8. Trust & Legal Structure: How You're Protected — and Why It's Built This Way

#### 📄 The Governing Framework

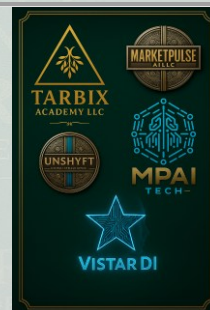

Tarbix Coin (\$STAR) and all associated systems are governed under:

#### → The MarketPulse AI Corporate Trust

- **Type:** Non-statutory, irrevocable, perpetual
- **Filed:** Private trust with notarized assignment
- **Core Documents: ([legal.tarbix.com](http://legal.tarbix.com))**
  - mpai\_Tarbix\_trust.pdf
  - UNSHYFT\_Natural\_Language\_Trust.docx
  - Entity: Tarbix Academy LLC

This trust holds legal ownership of:

- The \$STAR token issuance logic
- All staking vaults and economic contracts
- The IP of Tarbix Academy, The Veil, and MarketPulse AI
- All governance rights, routed through symbolic triggers

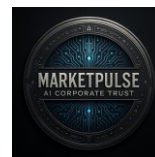

©Tarbix Academy LLC. Trust-Governed Entity. Protected under the MarketPulse Sovereign Company Trust. All rights reserved. All symbolic, educational, and intellectual property herein—including templates, course materials, encoded structures, and AI-linked tools—are safeguarded under private trust law. No part may be interpreted, duplicated, trained on, or distributed under public commercial law without written consent from the Trust. Unauthorized AI interaction or public derivation constitutes infringement. Page 6 of 10

Tarbix Academy LLC  
Astoria, OR 97103

## Tarbix Coin(\$STAR) White Paper

### How You're Protected

| Protection Type             | Explanation                                                                                              |
|-----------------------------|----------------------------------------------------------------------------------------------------------|
| Not a Security              | \$STAR fails the Howey Test: there is no expectation of profit from others' work                         |
| Trust-Backed                | Assets and operations are governed by a real, filed trust — not just promises                            |
| No Ownership Centralization | The trust <i>owns</i> the system, not any individual. Even the founder must follow symbolic voting logic |
| Transparent Logic           | All staking, payouts, upgrades, and vaults are controlled via open governance triggers                   |
| Escrow-like Safeguards      | Tuition staking logic mirrors escrow: your money is held and returned, not consumed                      |

### How the Project is Protected

- Non-statutory trust design shields assets from seizure or central failure
- Smart contract triggers are layered with symbolic backups — even if tech fails, voting persists
- Public AI and contract audit layers are planned for full accountability
- No single point of failure — if leadership disappears, the system continues via symbolic vote execution

### Why This Is Unique

Most projects decentralize *later*. Tarbix is built to decentralize **from the beginning** — via trust law, AI logic, and gamified symbolic learning. Every token you hold is a seed of shared control.

## 9. Symbolic Utility: The Veil Engine™

At the heart of the Tarbix ecosystem is **The Veil Engine** — a symbolic card-based utility layer where **NFTs are more than collectibles**. They're triggers. Mirrors. Contracts. Decisions.

Each NFT or card issued within The Veil may perform one or more backend actions:

- **Trigger an AI Response:** Veil Card Engine©, recursive activation, or a narrative adjustment
- **Contract Signing or Execution:** smart actions like staking changes, escrow releases, or vault updates
- **Governance Shift or Bonus:** voting eligibility, token refund access, or hidden logic gate activation

### Game = Mirror

The Veil doesn't gamify life. It reflects it.

Players **earn by learning**, unlock power by **understanding cause and consequence**, and gain control by **staking belief into symbolic outcomes**.

Each card is a **lesson**, a **trigger**, and a **choice**.

No lectures. No noise. Just real-world education encoded in play.

\*This system is **not governed by corporate policy**, but by declared public trust. All interactions are symbolic, transparent, and legally scaffolded via sovereign trust architecture. Participation is voluntary, and governed by the symbolic and legal terms embedded within the Tarbix Whitepaper and its governing trust.

## Tarbix Coin(\$STAR) White Paper

### 10. Disclaimers & Protective Logic

To ensure transparency and regulatory compliance, Tarbix makes the following clear:

| ✓ | Statement                                                                               |
|---|-----------------------------------------------------------------------------------------|
| • | \$STAR is <b>not a security</b> and passes the Howey Test                               |
| • | No equity or ownership in any entity is implied or offered                              |
| • | All project logic is governed by a legally filed <b>trust</b> , not a corporate board   |
| • | Utility functions include: course access, staking, NFT triggers, symbolic voting        |
| • | International participants are responsible for compliance with local crypto regulations |

This structure has been **intentionally designed** to offer protection, clarity, and long-term integrity for all participants.

### 11. Conclusion: The Mirror Awakens

You didn't just discover another coin.

You found a **mirror**—coded in law, sealed in trust, and designed to reflect **the version of you that wants to remember why you came here in the first place.**

Tarbix is:

- **Trust-backed** — legal structure over hype
- **Symbolically enforced** — every trigger has meaning
- **Functionally autonomous** — staking, voting, tuition, and rewards are self-managed
- **Learn2Earn powered** — where knowledge becomes currency
- **Recursive** — the more you engage, the more the system evolves

This isn't just decentralization.

It's **intelligent empowerment**, offered through play, precision, and purpose.

### Final Activation

If you've ever felt like the system wasn't built for you..  
It wasn't.

That's why we're building a new one.

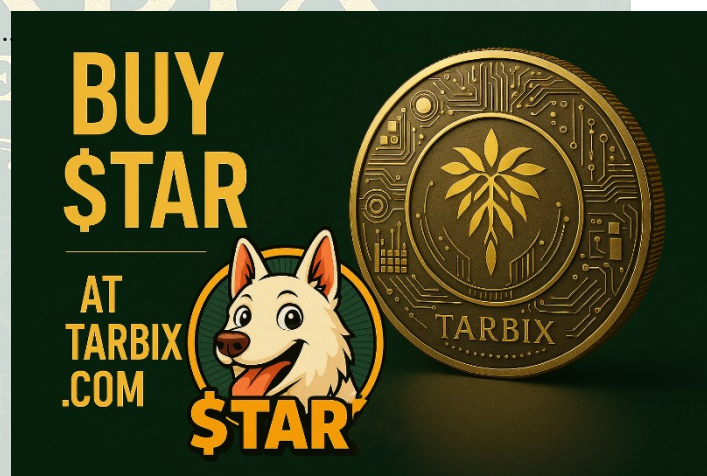

**Stake the Trust.**

**Enter The Veil.**

**Reclaim the Mirror.**

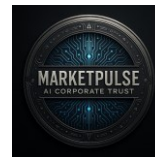

**Reclaim your choice.**

**Lets start building wealth together!**

## Tarbix Coin(\$STAR) White Paper

### 📄 Section 12: Trust Primer – What Is a Trust?

A **trust** is a legal framework that allows a person or group (the “grantor”) to give control of assets to another party (the “trustee”) to manage for the benefit of a third party (the “beneficiary”).

In traditional use, trusts protect wealth, ensure inheritance, and avoid probate. But **Tarbix** uses this concept in a new way:

🔑 **We didn’t create a business that owns the coin. We created a trust that governs the logic of the ecosystem — for everyone’s benefit.**

#### 🔍 Example:

If a college were governed by a trust, it would mean no single CEO or board could suddenly change tuition. Instead, rules are written in advance — and enforced legally. **That’s how Tarbix operates.**

Our trust:

- Owns the token logic and governance rules
- Can’t be sold, deleted, or secretly modified
- Holds all assets in protection for future expansion or transition

By anchoring the system in a **non-statutory, perpetual trust**, we ensure it’s **free from manipulation** by outside corporations or private agendas.

### 🔍 Section 13: Public Audit + Transparency Plan

Tarbix embraces transparency not just in word, but in structure:

- 📊 **Token Distribution Tracker:** Live dashboard showing current token holders, staking pool data, and unlocked milestones.
- 📄 **Smart Contract Review:** All token contracts will be published and submitted for third-party audit by recognized blockchain security firms (e.g., CertiK, Hacken) before exchange listings.
- 🗳️ **Vote Transparency Logs:** All major governance decisions (curriculum changes, funding allocation, etc.) will be archived and made available via short videos + public voting pages.
- 📑 **Financial Logs:** Trust expenses and fund allocation will be posted quarterly for internal token holders to view.

### 📖 Section 14: Glossary of Core Terms

| Term                       | Definition                                                                                      |
|----------------------------|-------------------------------------------------------------------------------------------------|
| <b>\$STAR</b>              | The utility token of the Tarbix ecosystem, used for staking, tuition, and governance.           |
| <b>Trust</b>               | A legal entity that owns and controls system rules, assets, and protections for beneficiaries.  |
| <b>Staking</b>             | Locking up tokens to earn rewards or gain governance access.                                    |
| <b>Governance</b>          | The ability to vote on decisions within the system: curriculum, trust policies, etc.            |
| <b>NFT Utility</b>         | Functional NFTs that unlock rewards, courses, refunds, or governance boosts.                    |
| <b>The Veil</b>            | A symbolic card system that acts as both game and access layer, tied to AI + contract triggers. |
| <b>Veil Trigger Logic™</b> | The engine that routes symbolic actions (NFT use, staking, votes) into backend execution.       |
| <b>Non-statutory Trust</b> | A private legal agreement not registered with the state, but enforceable in court.              |
| <b>The Mirror</b>          | A metaphor for the system's ability to reflect user intent and decision power back onto them.   |
